

1/1
Dear Commissioner Henney:

6050 99 NOV 30 P 2:01

I am extremely concerned about the safety of the food I EAT. I believe it is my RIGHT TO KNOW if the food I eat has been Genetically Altered. Genetically Engineered Foods pose unknown risks to People, The Environment, Family farmers, and Organic Farmers.

In May, a lawsuit was filed challenging the FDA's policy not to require labels on transgenic foods. I am writing in support of this lawsuit and demand testing for safety to everyone & every natural plant & animal. I support the labeling of Genetically Altered foods so that consumers have the right to know and choose what they are eating. It is sick ~~and~~, disgusting and extremely irresponsible to allow these genetically altered foods out of a laboratory.

Do not let these things happen. The FDA should assume GE Foods are dangerous until proven safe; And Label these too! C6346

Remember DDT & Dioxin were thought to be good! A Foolish mistake then for chemical companies profits hurt many and now we wonder how that happened.
Public Outcry - Form the FDA & Act to

to protect us. Be wise not foolish. Make the right decision, please do what is right.

This is your chance to support what is better for all humanity. Do not think Monsanto likes you.

Do not be a pawn.

Act properly so that your conscience will be clear.

People depend on the FDA and are blindly assuming their food is safe. Herbicides (poison), Pesticides (poison) and now laboratory altered food.

Basically Food that is NOT Real & Full of chemical poisons.

America's Diet. It makes me sick.

Sincerely,

Brian Hannegan
